Window and door system

KBE 76 Centre seal system AluClip

KBE 76 with AluClip is the perfect solution for people who want high-tech look windows. With AluClip, the aluminium facing shells are press fitted to the plastic profiles with a clip mechanism.

High-tech look windows

With KBE 76 you can combine aluminium and plastic in an innovative system. Which means you enjoy the advantages of both materials.

Aluminium is elegant, highly weatherproof, extremely stable and available in a wide range of colours. Plastic provides optimum heat and sound insulation, plus high functional reliability.

KBE 76 window with 76 mm construction depth

» Top heat insulation

Outstanding heat insulation compared with aluminium windows.

» Top design

Aluminium look on the outside, neutral white on the inside. Unlimited choice of colours with different coating technologies and numerous RAL colours.

» Top weather resistance

High strength and weather resistance due to the clip-on aluminium facing shell.

» Top value in money

Easy-care, durable and robust.
