KBE 88 *AddOn window system*

KBE 88

AddOn window system

Experience the future today with KBE 88 AddOn, the innovative aluminium interconnecting frame. It is simply affixed to your KBE 88 AluClip window system and offers functional enhancement and individual design. It can also be affixed to a window that has already been installed.

Integrated blind

One of the special features of KBE 88 AddOn is the integrated privacy and sun-protection feature. It is located between two glass panes and is therefore fully weather protected. The blind can be manually or electrically operated.

Improved soundproofing and heat insulation

As a result of the additional glass pane, KBE 88 AddOn improves soundproofing and heat insulation performance. The new system enhances quality of life and contributes to long-term energy cost savings and CO₂ emission reductions.

The AddOn interconnecting frame cannot be opened from the outside when the window is closed, so it offers excellent security. When the window is open, the interconnecting frame can be simply unlocked and opened. This ensures easy access for cleaning.

KBE 88 AddOn window

- » Optional privacy and sun protection feature between two glass panes
- » Suitable for plastic windows with aluminium facing shells
- » An additional glass pane improves soundproofing and heat insulation properties
- » Optimum cost-effectiveness, eco-friendliness, durability and robustness
- » Practically unlimited choice of aluminium shell colours with finishing techniques including Eloxal and powder coating
