

KBE 88

Uncompromisingly good windows

**Satisfies
passive house
requirements!**

KBE 88 Window and door system

KBE 88

Window and door system

KBE 88 is the window and door system of the future. It sets new benchmarks in quality, heat insulation, security and design. A modular concept plus innovative upgrade technologies ensure that the KBE 88 user has plenty of scope for individualisation.

Passive house conformity as a standard feature

KBE 88 has an innovative, highly insulating 7-chamber centre seal system and optimally dimensioned steel reinforcements. As a result, even the standard version with 48 mm thick triple glazing achieves the high level of heat insulation necessary for a passive house concept to work.

One system, no compromises

KBE 88 offers maximum design freedom and it is exceptionally stable and easy to care for. Intelligently designed for state-of-the-art functional glazing, KBE 88 is suitable for large windows and solar energy gain. The new generation of profiles also offer effective solutions for home security and soundproofing requirements.

KBE 88 window and door system

- » **Linear, recessed design with narrow profiles for maximum light incidence and high solar energy gains**
- » **Passive house certified in accordance with ift directive WA-15/2**
- » **Glazing thicknesses of between 24 mm and 58 mm**
- » **Central steel arrangement for high stability**
- » **Countless window designs and insulation options for exceptional design freedom**
- » **White, foil laminated or with aluminium shell**
- » **Long lifespan with low maintenance and care requirements**
