

**PRESS RELEASE**

**profine opens another mixing plant in Russia**

On 5 June 2014, profine Group officially put into operation an additional mixing plant at its production site in Voskresensk near Moscow. With this second plant, the Group is expanding the mixing capacity by 26,000 t pa at its largest production site abroad.

“This new mixing plant represents a further step into the future on the Russian market. We want to set a good example by consolidating our leading position on the market and strengthening the yearlong partnership with our Russian customers,” said Dr Peter Mrosik, owner and CEO of profine, at the inauguration.

Under the KBE brand, the company has been operating on the Russian market for about twenty years and has gained a reputation there as a pioneer and clear market leader for PVC-U window profiles, enjoying a high level of awareness right up to the end consumers.

During the ceremony with customers, local politicians and trade representatives, Dr Peter Mrosik, assisted by Alexander Kalinnikov, the highest ranking administrative official for the Moscow region in Voskresensk, and profine COO Hans-Willi Neumann, cut the symbolic ribbon.

After visiting the new mixing plant, the guests could then see for themselves the profine system expertise on a tour through the technical and training centres.

Dr Peter Mrosik: “Our customers have a right to the highest quality, competitive products, and the best service. And we intend to continue upholding this right with ultra modern technology, our strong brands, our commitment, and our enthusiasm for joint success.”
