

PRESS RELEASE

Threshold system "PremiPlan plus" wins pro-K award 2018

The newly developed threshold system "PremiPlan plus" by profine Group has won the pro-K award 2018 in the category of domestic installations and technology.

"PremiPlan plus" is a premium threshold system for maximum accessibility with a high degree of comfort - when installed at ground level zero millimeters.

A parallel lowerable floor seal is a central component of a multi-level and integrated sealing concept that achieves maximum values with specially developed structured parts. The modular design of the system allows efficient manufacturing and installation.

At the Fensterbau Frontale 2018 in Nuremberg, profine will present the innovative threshold system "PremiPlan plus" to the industry for the first time.

Dr. Peter Mrosik, owner and CEO of profine: "We are very proud to have won this prestigious award for the fourth time in a few years and we are delighted that our sustainable work in the development of market-driven and innovative products has once again been rewarded."

Since 1979, the pro-K Industrieverband Halbzeuge und Konsumprodukte aus Kunststoff e.V. (industrial association for synthetic material semi-finished and consumer products), has been presenting this award to outstanding plastic products in order to make the public aware of the performance characteristics of plastics.

A total of 17 innovative synthetic material products in 10 categories received awards from an expert jury this time. The official award presentation ceremony will be taking place at the pro-K award night on 11 January 2018 in Frankfurt/Main.
